Adonis D. Martin

Full-Stack Software Engineer

ABOUT

Hola! I am a classically trained Ballet and Modern dancer turned Full-stack engineer from Cuba.

My dancing career laid a foundation of skills in collaboration, learning on the job, and thinking in innovative ways that I am excited to bring with me into software engineering.

I am looking for an entry level full stack position where I can continue to grow my skills as a full-stack software engineer.

PROJECTS

Chulo Code Demo

I built this app myself from start to finish, using MongoDB, Express, React, Node and Bootstrap. Hosted on Heroku. Inspired by Hulu.

Burning rubber Code Demo

I used css animations to bring it to life, is very fun and easy to game play. Built with HTML/CSS, Javascript, and jQuery.

Project Wayfarer Code Demo

Project Wayfarer was built in a four people team project. While I focused on the front-end I was able to also implement some of the features in the back-end. This project was built with MERN (Mongodb, Express, React, Node) stack . Hosted on Heroku.

EXPERIENCE

General Assembly Full-Stack Immersive, 2019

- Completed a full-time 12 week in-person course.
- Attended lectures and worked with mentors to rapidly learn new languages and technologies.
- Worked in groups of students and designers to deliver high quality full-stack projects.

Ballet & Modern Dance Performer, 2008 - 2019

- Developed relationships with other dance professionals through effective communication
- Learned choreography quickly and adapted to changes seamlessly by maintaining physical and mental flexibility.
